

Health and safety policy

In Zeppelin Danmark we are determined to be recognized as a business partner that creates high quality solutions in a safe manner. We are committed to providing safe and healthy working conditions and to continually assess and remove or mitigate any risks that arise in our work processes. The goal is to prevent any work related accidents or illnesses.

On strategic level that means:

- Health and safety aspects are a natural part of all our business decisions
- Our managers serve as role models who encourage all employees to have a strong focus on health and safety by developing, leading and promoting our safety culture
- Proper funding as well as management support ensure that we can take appropriate measures to reduce work related health and safety risks
- We comply with applicable legal occupational health and safety requirements as well as requirements from the Zeppelin Group and Caterpillar
- Our health and safety organisation is supported by the management and is entitled to the necessary training and resources
- We monitor our health and safety performance and we continually seek to improve it. Health and safety plans - including objectives - are formulated and implemented
- Lessons are learned from accidents and incidents as well as findings from audits and inspections
- It is recognized at all levels in our organisation that high quality in our work is inseparable from high safety standards

On operational level that means:

- We have a common understanding that we are all responsible for our own safety and the safety of our colleagues
- If we have any doubts about the safety in a given situation, we do not continue the task – at least not without getting a competent second opinion
- Job preparation is essential to working safely. We follow instructions, seek information and use the mandatory personal protection equipment
- We speak up in case we observe unsafe situations or behaviour and we welcome any feedback in relation to our own safety behaviour
- Reporting unsafe situations and near-misses are important contributions in keeping our workplace safe

The Management Team of Zeppelin Danmark is responsible for ensuring that the health and safety policy is understood, implemented and maintained at all levels in the organisation.

We are Zeppelin – We Create Solutions in a Safe Manner.
